DETAILED ACTION

This office action is in response to the action, received 4/7/04.

Claims 1-53, 248-281, 371-398, and 446-458 are pending.

Claim Rejections - 35 USC § 102

Claims 1-53, 248-281, 371-398, and 446-458 stand rejected under 35 USC 102 (B) as being anticipated by Ekwuribe (USPN 6,309,633) for the reasons set forth in the previous office action which are restated below.

Ekwuribe teaches a drug-oligomer conjugate, wherein D is a therapeutic drug moiety, H and H' are each a hydrophilic moiety, and L is a lipophilic moiety. The therapeutic drug moiety is preferably insulin or a functional equivalent thereof, see abstract, claim 1 and claim 4. Ekwuribe teaches various oligomers, see column 10, lines 1-3. Ekwuribe discloses synthesis of chemically modified insulin with oligomers has been accomplished, see column 29, lines 1-3.

Applicant's arguments were carefully considered but were not found persuasive.

Applicant contends that Ekwuribe does not teach coupling an oligomer with a proinsulin polypeptide which results in coupling of the oligomer to the insulin polypeptide portion thereof. Further, Ekwuribe does not describe that one or more peptides are cleaved from the conjugate to provide the insulin polypeptide-oligomer conjugate. However, the Ekwuribe reference teaches a drug-oligomer conjugate which reads upon insulin (see, e.g., for example, column 4).

Art Unit: 1654

Furthermore, the Ekwuribe reference discloses that the length and composition of the lipophilic components and the hydrophilic components may be adjusted where the conjugate is to be administered (see, e.g., for example, column 5).

Therefore, the reference is deemed to anticipate the instant claims above, especially in the absence of clear and convincing evidence to the contrary.

Claim Rejections - 35 USC § 103

Claims 1-53, 248-281, 371-398, and 446-458 stand rejected under 35 USC 103 (a) as being unpatentable over Ekwuribe (USPN 6,309,633) for the reasons set forth in the previous office action which are restated below.

Based upon the beneficial overall teachings provided by Ekwuribe with respect to synthesis of chemically modified insulin with oligomers, it is apparent that one of ordinary skill in the art would have had a reasonable expectation of success in producing the claimed invention. Therefore, the invention as a whole was *prima facie* obvious to one of ordinary skill in the art at the time the invention was made, as evidenced by the reference, especially in the absence of evidence to the contrary.

Applicant's arguments were carefully considered but were not found persuasive.

Applicant contends that Ekwuribe does not teach or suggest the novel and unexpected conjugate then cleave approach as claimed. However, the Ekwuribe reference teaches a drug-oligomer conjugate and discloses that the length and composition of the lipophilic components and the hydrophilic components may be adjusted where the conjugate is to be administered.

Art Unit: 1654

Thus, the invention as a whole is *prima facie* obvious over the reference, especially in the absence of clear and convincing evidence to the contrary.

Conclusion

All claims are rejected.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

This application contains claims 54-247, 282-370, 399-445, and 459-467, drawn to an invention nonelected with traverse in Paper 0903. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP 821.01.
